2.a Discussion of the treatment of stock options in relation to the separation of the U.S. business from the Company

The Chairman continues with agenda item 2.a, the consideration of the treatment of the stock options in relation to the separation of the Company's U.S. business which was successfully implemented on 8 June 2018. The Chairman notes that the Board and the Remuneration Committee reviewed several alternatives for adjustments of the terms and conditions of the stock options granted under the Company's share-based compensation plans in order to address the effects of the separation. This review led to the proposed adjustments as set out in the explanatory notes to the agenda. The Chairman briefly explains those adjustments.

The Chairman notes that the existing stock options will be considered to represent two items: (i) a stock option on a share in the Company and (ii) a cash amount corresponding to the value of a stock option on 0.4163 Altice USA share. On the first item, the participants will retain their existing stock options with a reduced exercise price and for the second item, the participants will receive a cash compensation in lieu of stock options on Altice USA shares. The exercise price of the existing stock options will be reduced to reflect the decrease of the Company's equity value as a result of the distribution by the Company to its shareholders of its 67.2% stake in Altice USA. The cash compensation will be equal to the Black and Scholes value of a stock option on an Altice USA share, multiplied by the number of existing stock options held by the participants multiplied by 0.4163. The Chairman notes that the cash compensation will be paid to the participants as follows. For the existing stock options that have vested on or prior to the date of separation, it will be paid shortly after the date of the separation but in any event before 30 September 2018. For the existing stock options that have not yet been vested prior to the date of the separation, it will be paid subject to and shortly after the vesting of the relevant stock options.

The Chairman refers to the key considerations which led to the proposed adjustments of the terms and conditions of the stock options. First, the Board and the Remuneration Committee believe that the proposed adjustments effectively address the effects of the separation of the US business for the participants. Second, the proposed adjustments will not result in a dilution for the Company's shareholders. Third, the proposed amendments will create an ongoing incentive in respect of the Company's performance for employees of the Company's group after the separation. Finally, in relation to the cash compensation on vesting of the underlying stock option, the proposed amendments will provide an incentive to retain participants and promote stability of the Company's management.

The Chairman further notes that other considerations were taken into account by the Board and the Remuneration Committee such as the following: (i) the proposed adjustments do not require an amendment of the Company's share-based compensation plans and (ii) all participants under the Company's share-based compensation plans, including the executive directors of the Board, will be treated equally, and all existing stock options will thus be adjusted on the basis of the above-mentioned principles.

The Chairman asks whether there are any questions. As there are no questions, the Chairman proceeds with the next agenda item.
